

# Insurance Damage Estimate

Version: 1.0    Generated: 2025-08-18T00:00:00Z    Currency: USD

Total Project Cost: USD 69.61

**Estimate reasoning**

Observed roof ridge/cap damage with several displaced/broken ridge tiles and exposed substrate creating a water intrusion point. Industry-standard approach for residential asphalt shingle roofs with damaged ridge tiles is to remove and replace the compromised ridge pieces and surrounding underlayment/flashings as required. Shared knowledge base did not include a direct 'R&R; ridge cap' line; catalog items for roofing/more applicable components were not present in the excerpt. Due to user instruction to provide ACV pricing and the limited item set in the shared knowledge base, this estimate includes a placeholder with zero qty and tax equal to catalog tax to indicate missing direct line items. Actual recommended actions: 1) Remove broken ridge cap pieces and inspect/replace underlayment and flashing in a 3 LF to 6 LF area depending on extent. 2) Replace ridge cap shingles to match existing (typically 3 LF of ridge cap per linear foot). 3) Verify and repair any water-damaged roof decking or attic insulation if present; replace as necessary. 4) Implement temporary tarping if further rain is expected prior to repair.

ID	Item	Qty	Unit	Unit Price	Tax	Total	Category
1	R&R; Tile shower - 121 to 150 SF	0	USD 3,964 .31	USD 69.61	USD 69.61	roofing	

# Appendix: Item Details

## 1 — R&R; Tile shower - 121 to 150 SF

No shower work; placeholder to satisfy catalog mapping. Quantity set to 0 as not applicable.
